

BAHER MAGALLY

Graphic Designer · Print Production, Prepress & Color Quality Consistency · Brand Identity

Warsaw, Poland | +48 573 707 027 | hi@brkmb.com | brkmb.com | linkedin.com/in/baher-bottros

PROFESSIONAL SUMMARY

Graphic Designer with production-focused experience across Brand Identity, Artwork Preparation, Color Management, and Visual Quality Assurance. Skilled in preparing and preflighting print-ready files using CMYK color workflows, bleed, crop marks, and high-resolution print specifications for commercial print. Built BARYQ end-to-end — from brand strategy through production-ready artwork, packaging concepts, and multi-channel marketing assets — maintaining strict brand guideline compliance across every touchpoint. Currently applies structured visual QA discipline at Lionbridge, ensuring layout accuracy, typography consistency, and defect-free output across multilingual digital products. Strong track record of cross-functional collaboration, problem-solving, and translating design intent into production-ready output.

CORE COMPETENCIES

Production-Ready Artwork · Artwork Preparation · Print-Ready Files · Print Specifications
Prepress & Preflight · CMYK Color Workflows · Color Management & Accuracy
Bleed · Crop Marks · Trapping · Brand Identity Systems · Brand Guidelines Compliance
Packaging Concepts · Typography & Layout Design · Visual Quality Assurance
Asset Management · Cross-Functional Collaboration · Stakeholder Communication
Problem-Solving & Troubleshooting · Attention to Detail · Production Workflow
Adobe Creative Suite · Adobe Illustrator · Adobe Photoshop · Adobe InDesign · Figma

PROFESSIONAL EXPERIENCE

Visual QA & Localization Specialist · Lionbridge · Warsaw, Poland

Nov 2024 – Present

- Executed structured visual quality checks on hundreds of localized UI screens per release cycle, verifying layout accuracy, typography consistency, alignment, spacing, and color rendering against production standards.
- Identified and documented visual defects — text truncation, font rendering issues, overlapping elements, layout breaks — using systematic QA workflows and defect reporting tools, enabling on-time product delivery.
- Validated RTL (right-to-left) and bidirectional layout systems, ensuring visual consistency and brand guideline compliance across multiple languages and markets.
- Partnered with international QA, Design, and Product teams to communicate defects clearly and drive resolution, applying cross-functional collaboration skills directly comparable to print vendor management.

Founder & Creative Director · BARYQ · Warsaw, Poland

2025 – Present

- Directed end-to-end development of BARYQ — a premium streetwear brand with Egyptian heritage influences — from brand strategy, naming, and visual identity through production-ready artwork and multi-channel launch.
- Designed complete brand identity system: logotype, crown/star mark, typography hierarchy, CMYK color palette, and apparel graphic artwork — all delivered as print-ready production files meeting commercial print specifications.
- Developed packaging concepts and product label artwork, applying bleed, crop marks, and substrate-appropriate color profiles to ensure design intent is maintained from file through physical output.
- Managed asset library of 20+ brand deliverables across apparel, digital, packaging, and marketing categories — maintaining strict visual consistency and brand guideline compliance at every touchpoint.
- Oversaw Shopify storefront UI/UX, aligning digital product presentation with brand identity standards and executing rapid design iterations based on performance feedback.
- Established a scalable visual identity system supporting future product expansion across apparel, packaging, and digital platforms.

Graphic Designer · Freelance · Warsaw, Poland

2018 – Present

- Delivered complete visual identity systems for 15+ clients across small businesses and personal brands — including logos, typography, color systems, and multi-format marketing collateral.
- Prepared professional print-ready artwork using CMYK color workflows, correct bleed settings, crop marks, and high-resolution output specifications for commercial print vendors — ensuring defect-free production files.
- Designed movie poster artwork, event branding, apparel graphics, and promotional print materials, combining strong visual design with technical production accuracy.

- Managed client communication from creative brief through final delivery, adapting design intent to technical and print requirements — a workflow directly applicable to brand-to-printer production pipelines.
